billalbertcode@gmail.com • +58 414 2240292 • <https://github.com/BillalbertCode> • <https://billalbertcode.vercel.app>

Web Developer with +3 years of technical experience and solid track record in process management and logistics. Specialized in the TypeScript ecosystem for the delivery of scalable end-to-end solutions.

### Education

Colegio universitario de Caracas (UNEXCA)  
Computer Engineering.

Floresta, Caracas  
2023 – Current

### Experience

#### SoyElGeek

Panama

#### Desarrollador de Proyectos Web

OCT 2024 – ENE 2026

I led the end-to-end development of custom application web solutions with TypeScript, React, Node and WordPress sites. Collaborating directly with external IT teams and stakeholders through weekly meetings and direct communications.

- Invoiced order tracking system with +500 visits/month
- Automatic email management with financial control ensuring accuracy of real credits and a light audit layer of the processes.
- Deployment of applications in a controlled Serverless environment on GCP with Docker, optimizing deployment times and guaranteeing the high availability of the ordering system.

#### Freelance Collective

Venezuela

MAR 2019 – DEC 2021

Collaborated directly with external clients to turn their requirements into functional websites. Participating in multidisciplinary teams alongside designers, backend and product to ensure an optimal user experience.

- I built interfaces with JavaScript and React, adapting them to the specific needs of each client. Delivered all projects within the agreed deadlines, achieving high customer satisfaction.
- I made improvements and corrections in existing systems developed in PHP with CakePHP and Laravel
- REST API handling and consumption

### Skills

**Technical Skills:** React, Nextjs, Typescript, Express, MongoDB, Docker, GCP, PostgreSQL, Prisma

**Other Skills:** CI/CD, Agile Methodologies, Responsible handling of Agentic AI

**Languages:** English A2 - technical reading, Spanish (native)
